

## Table of Contents:

1. Introduction	1
2. Characteristics of Synchrotron Radiation	3
2.1 Introduction	3
2.2 Radiation from a Bending Magnet	3
2.3 Radiation from a Wiggler	7
2.4 Radiation of an Undulator	9
3. Upgrading of BESSY I	14
3.1 Introduction	14
3.2 Performance of a Synchrotron Light Source	14
3.2.1 Spectral Range of the Synchrotron Radiation	14
3.2.2 Brilliance of the Radiation	14
3.2.3 Number of Experimental Stations	15
3.3 Upgrading Versions of BESSY I	15
3.3.1 Green Book Proposal	15
3.3.2 Upgrading of BESSY I to 2 GeV	16
3.3.2.1 Upgrading to a 6-fold Symmetry and DBA-Lattice	16
3.3.2.2 Upgrading to a 8-fold Symmetry and DBA-Lattice	16
3.3.2.3 Upgrading to a 8-fold Symmetry and TME-Lattice	16
3.4 Comparison of the Different Versions	17
3.4.1 Magnets	17
3.4.2 Performance of the Different Upgrading Versions	18
3.4.2.1 Without a “Mini-Beta-Section”	19
3.4.2.2 With a “Mini-Beta-Section”	20
3.5 Main Parameters of the Versions SES_4_1 and SES_4_2	20
3.6 Characteristics of the Radiation from the Different Versions	22
3.6.1 Characteristics of the Radiation from the Bending Magnets	22
3.6.2 Characteristics of the Radiation from the Wigglers	25
4. Beam Optics	30
4.1 Introduction	30
4.2 The Lattice	32
4.3 Choice of Working Point	36
4.4 Effect of Insertion Devices on SESAME Optics	38
4.5 Closed Orbit Correction	40
4.6 Coupling	43
4.7 Specifications of the Magnets	43
4.7.1 The Bending Magnets	43
4.7.2 The Quadrupole Magnets	43
4.7.3 The Sextupole Magnets	44
4.7.4 The Corrector Magnets	44
4.8 Lifetime of the Stored Beam	44
4.8.1 Introduction	44
4.8.2 Elastic Scattering at the Nucleus (Coulomb Scattering)	45
4.8.3 Inelastic Scattering at the Nucleus (Bremsstrahlung)	46
4.8.4 Elastic Scattering at the Bounded Electrons	46
4.8.5 Inelastic Scattering at the Bounded Electrons	47

4.8.6 Touschek Lifetime	48
4.8.7 Lifetime Conclusions	49
References	50
<b>5. Layout of the Storage Ring</b>	<b>51</b>
5.1 Introduction	51
5.2 Description of the SESAME Storage Ring	51
5.3 Choice of Material	56
5.4 Multipole Vacuum Chambers	57
5.5 Dipole Vacuum Chambers	57
5.6 Bellows and Gate Valves	58
5.7 Synchrotron Radiation and Absorbers	59
References	61
<b>6. Magnets</b>	<b>62</b>
6.1 Introduction	62
6.2 Bending Magnet	62
6.3 Quadrupole	66
6.4 Sextupole	66
6.5 Combined Sextupole-Quadrupole Magnet	69
6.6 Girder System	73
References	74
<b>7. Vacuum System</b>	<b>75</b>
7.1 Introduction	75
7.2 SESAME Parameters	75
7.3 Requirements	75
7.4 Material for Vacuum Chamber	75
7.4.1 General	75
7.4.2 Vacuum Chamber Design	77
7.5 Calculations	77
7.5.1 Photon Flux from the Dipoles	78
7.5.2 Photon Stimulated Desorption (PSD)	79
7.5.3 Photodesorption Along the Straight	81
7.5.4 Thermal Desorption	81
7.5.5 Pressure Profile	81
7.6 Lumped or Distributed Pumping?	86
7.7 Pumps Selection	87
7.7.1 Rough Pumping	87
7.7.2 UHV Pumps	87
7.8 Vacuum Instrumentation	87
7.8.1 Total Pressure Gauges	87
7.8.2 Partial Pressure Gauges	88
7.9 In-situ Bake Out	89
References	89
<b>8. Radio Frequency System</b>	<b>90</b>
8.1 Introduction	90
8.2 Components of the RF-System	91
8.2.1 Cavities	91
8.2.2 Klystron	92
8.2.3 Waveguide System	93

8.2.4 Low level Electronics	93
8.2.5 Principle of Operation	93
8.3 RF System Parameters	95
8.4 Low level Electronics	98
8.4.1 Amplitude Loop	98
8.4.2 Phase Loop	99
8.4.3 Tuning Loop	100
<b>9. Power Supplies</b>	<b>102</b>
9.1 Introduction	102
9.2 Booster Power Supplies	102
9.3 Storage Ring Power Supplies	105
9.4 Installed Power of the Machine	107
9.5 Disturbances to the Mains	108
9.6 Power Supplies Upgrade	108
9.6.1 Collaboration with Yerphi	108
9.7 Connection of the Magnets	110
9.8 Location of the Power Supplies	112
References	113
<b>10. Diagnostics</b>	<b>114</b>
10.1 Introduction	114
10.2 Instrumentation	114
10.3 Measurement Procedures	114
10.3.1 Beam Intensity and Time Structure	114
10.3.2 Beam Position	115
10.3.3 Transverse and Longitudinal Particle Distribution	115
10.3.4 Lattice Functions, Tune and Dynamic Aperture	115
10.3.5 Measurement of Other Accelerator Parameters	116
10.4 Diagnostic System of SESAME	116
10.4.1 Fluorescent Screens	116
10.4.2 Current Transformer	116
10.4.3 Strip Lines	116
10.4.4 Scrapers	116
10.4.5 Beam Position Monitors	117
10.4.6 Synchrotron Light Monitors	118
10.4.7 Other Instrumentation	118
<b>11. Injector</b>	<b>119</b>
11.1 Introduction	119
11.2 Microtron	119
11.3 Booster Synchrotron	120
11.4 Transfer Line	122
11.5 Injection to the Storage Ring	127
11.5.1 Optimization of the Places of the Kickers	127
11.5.2 Effect of Sextupoles	127
11.5.3 Injection Efficiency Studies and Simulation of Injection Process	129
References	132

12. Control System	133
12.1 Executive Summary	133
12.2 Introduction	133
12.3 General Requirements	134
12.4 Architecture	134
12.4.1 Hardware Layer	135
12.4.2 Software Layer	135
12.4.3 Applications with Graphical User Interface	136
12.4.4 The Databases	137
12.4.5 Machine Physics Applications	138
12.5 Subsystems	139
12.5.1 Timing System	139
12.5.1.1 Architecture	139
12.5.2 Diagnostics	140
12.5.3 Beamline Controls	140
12.6 Control Room	140
12.7 Network	140
References	140
13. Site, Building and Infrastructure	142
13.1 Introduction	142
13.2 The SESAME Building	142
13.3 Infrastructure	153
13.4 Cooling System	157
